HISTORY

HISTORY OF UNY GROUP

UNY GROUP was founded in 2005 by Mr **Umran Nazif Yigiter**. Originally a trading company, UNY GROUP has evolved to become one of the leading global producers of LVT, SPC and WPC flooring.

2005 | FOUNDING OF UNY

The company was established with a vision to offer premium flooring products, starting with a focus on creating durable and aesthetically pleasing options for both residential and commercial spaces.

EXPANSION INTO NEW MARKETS

Over the years, the company expanded its market presence , gaining recognition in various regions for its high-quality flooring solutions, especially in the categories of LVT (Luxury Vinyl Tile), SPC (Stone Plastic Composite), Loose Lay LVT, LSPC, and WPC (Wood Plastic Composite).

2021 | BUILDING A STATE-OF-THE-ART FACTORY

To meet the growing global demand for its flooring products, UNY invested in a new factory in Yixing, China. This factory is equipped with advanced technologies and manufacturing capabilities, marking a significant step in the company's expansion and commitment to innovation. The factory is fully owned by the UNY Group.

ONGOING GROWTH AND INNOVATION

With a strong focus on private label projects, UNY continues to provide tailored solutions for customers around the world. The company remains dedicated to advancing technology, ensuring that it stays at the forefront of the flooring industry. Today, the UNY Group is known not only for its high-quality products but also for its constant investment in technology and sustainability to meet the demands of an ever-evolving global market.

2021

Uny group built a state of the art factory in China.

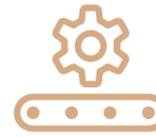

Location: Yixing

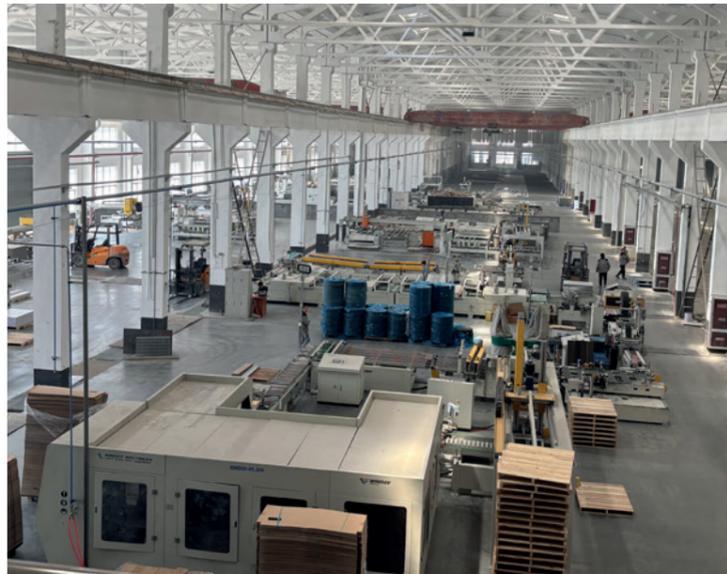

Total factory area of 80.000 sqm²

430 employees

4.950.000 m² monthly capacity

ASSORTMENT

If you want the look and feel of a hardwood flooring but don't want the maintenance and risk of damage, than Uny Group has the solution for you!

UNY GROUP offers you a selection of LVT, SPC, Loose lay, WPC and LHDF. All designed to make your flooring kids- and pets-friendly, resistant to indentations and 100% waterproof. Our flooring is easy to install and suitable for all rooms.

Let us transform your house in a warm carefree home!

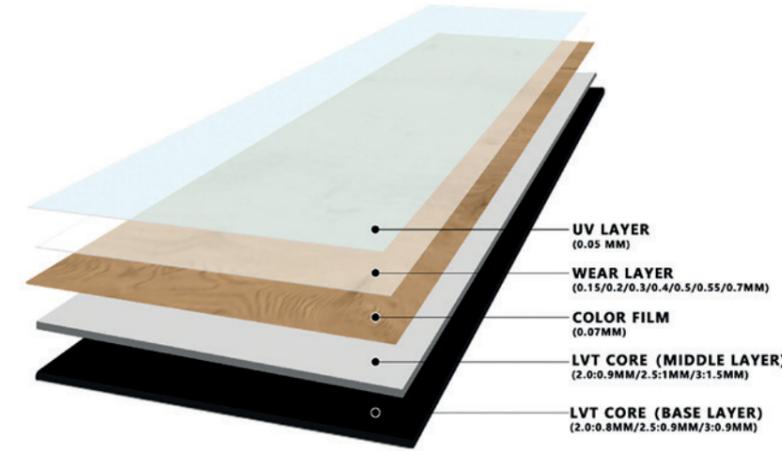

LUXURY VINYL TILE

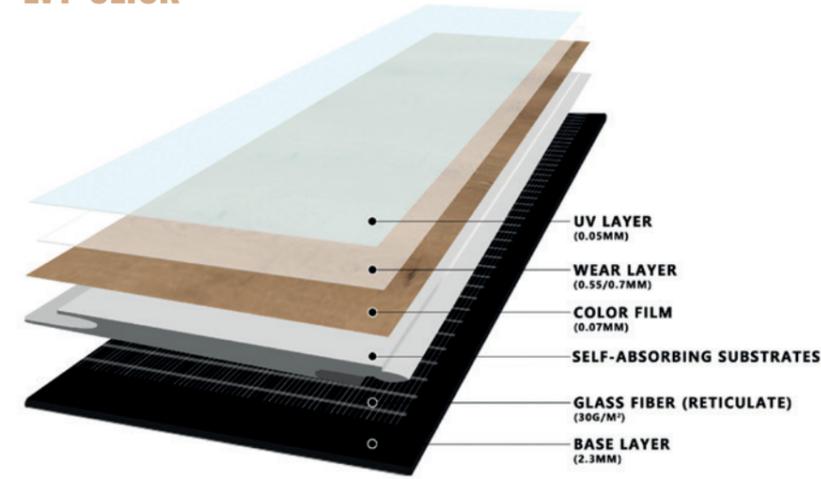

Made out of 5 distinct layers.

Luxury vinyl tiles are commonly made from multiple layers of PVC vinyl and can be installed with a click system or dry back.

LVT-A

LVT-CLICK

BENEFITS OF LVT

- Waterproof
- Great durability
- Warmer than tiles and laminate
- Softer than tiles and laminate
- Limitless colours
- Ideal for commercial and residential installations

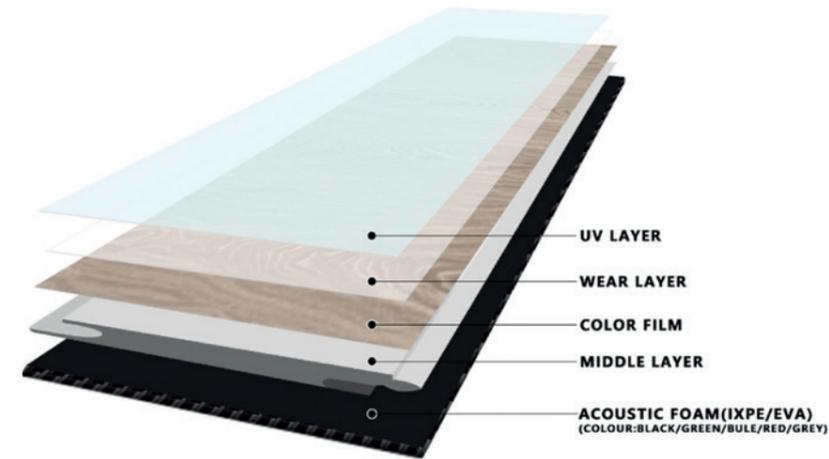

SOLID POLYMER COMPOSITE

5 layers, including an acoustic base, click system.

SPC is more rigid than traditional vinyl because its core is made of limestone and stabilizers.

Considered the next generation vinyl flooring, they are 100% water resistant, being much more versatile and suitable for all types of spaces, including wet rooms in the house such as bathrooms and kitchens.

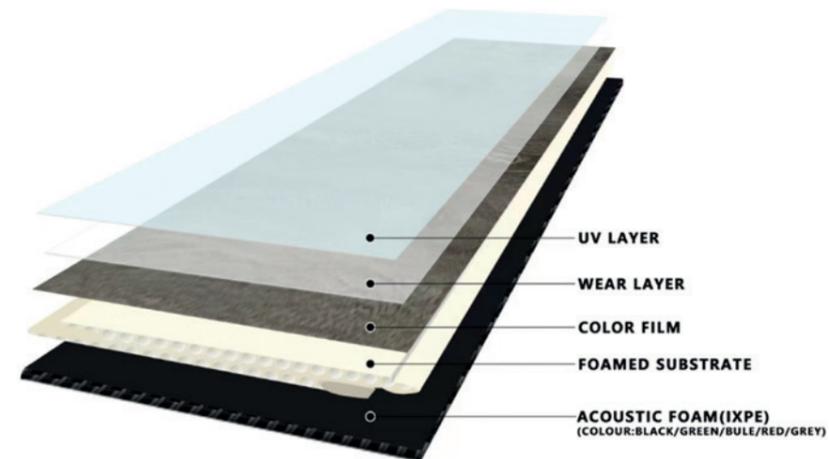

BENEFITS OF SPC

- 100% waterproof
- Great insulation/soundproof
- High resistance to shock and impact
- High resistance to temperature and humidity
- Easy installation

LIMESTONE PLASTIC COMPOSITE

Designed to be lighter and thicker than a traditional SPC floor.

BENEFITS OF LSPC

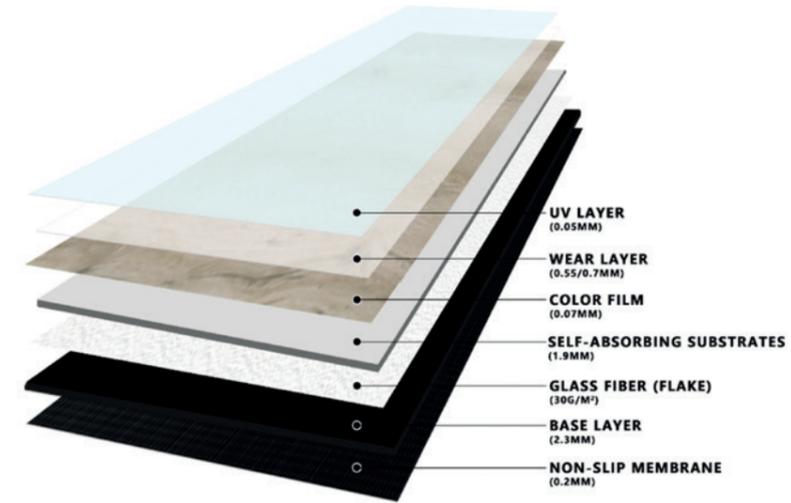

- 100% Waterproof and highly durable - performs exceptionally well in moisture-prone areas
- Lighter than SPC - easier to handle and install
- More comfortable underfoot - built-in underlayment for extra cushioning and noise reduction
- Thicker and more stable - designed to be dimensionally stable, resisting expansion and contraction in changing temperatures
- Ideal for large planks - you can design extra-wide or extra-long planks for a modern, high-end look

LOOSE LAY

LOOSE LAY

Loose lay vinyl refers to an installation method that uses the weight of the planks and a rubber backing to keep them in place (instead of glue or nails).

BENEFITS OF LOOSE LAY

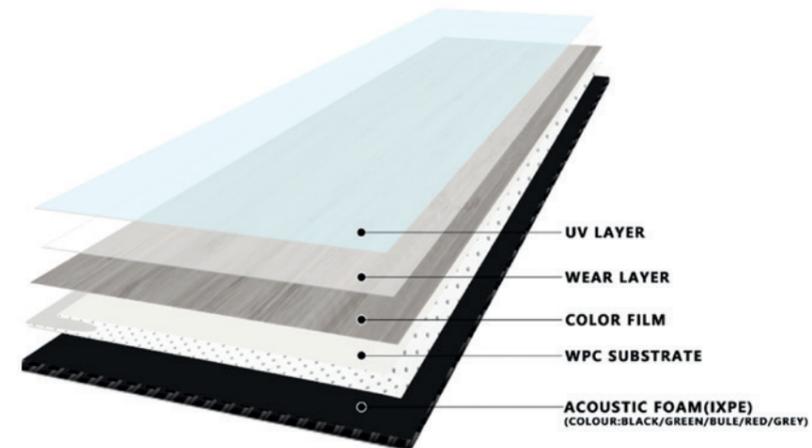

- Easy to install, can be installed over other floors
- Easy to replace (per piece)
- Excellent sound absorption
- Does not expand or contract
- Affordable installation

LOOSE LAY

WOOD PLASTIC COMPOSITE

WPC products are 100% waterproof engineered luxury vinyl planks and tiles which DIY-friendly, featuring an effortless interlocking system that can be installed over most existing subfloors.

BENEFITS OF WPC

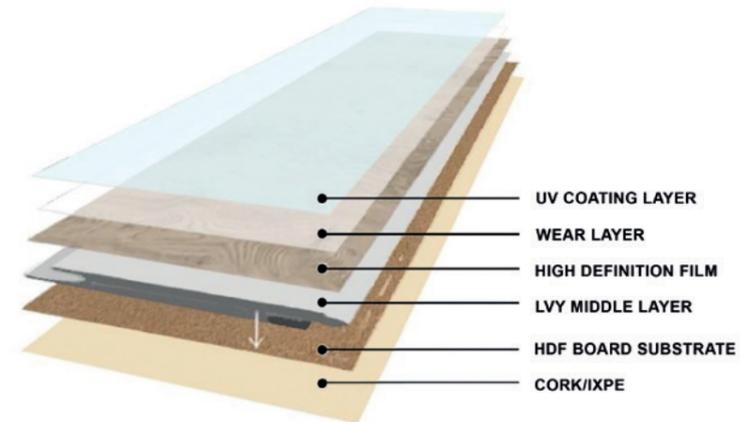

- 100% waterproof, WPC core is 100% waterproof!
- Perfect for imperfect floors
- Realistic wood- and stone look
- More resistant than tile
- Almost no maintenance

LACQUERED HIGH DENSITY FIBREBOARD

This collection guarantees extreme stability due to the low thermal expansion and contraction rate.

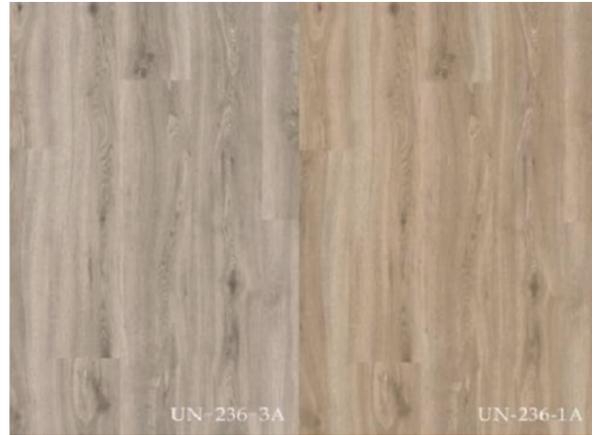

Suitable for wall-and acoustic wall panels.

BENEFITS OF LDHF

- Environmentally friendly and healthy
- Formaldehyde free, adhesive and environmentally friendly coating
- Easy installation
- The locking design allows floating installation without the use of glue or nails
- Quick and cost saving installation
- Diverse styles (classic wood, stone, marble,...) suitable for each interior
