

FN | XTRU^{PRO}

The extruded all-rounder!

FN digiprint
possible

FN | XTRU^{PRO}

Punch, glue, done!

Our new extruded skirting board is blowing professionals away! Innovative, robust and clever down to the last detail: at its heart is a stable MDF core with full polypropylene coating: high-quality look, optimum protection. However, the biggest advantage lies in the corner. This is cleanly punched rather than sawn – for a perfect result with closed edges. Our FN TURN-X reversible profile has a special twist and offers an absolute innovation: two moulding shapes in one!

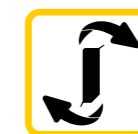

In short: save time, hassle, mess and more with FN XTRU^{PRO}.

PRODUCT ADVANTAGES:

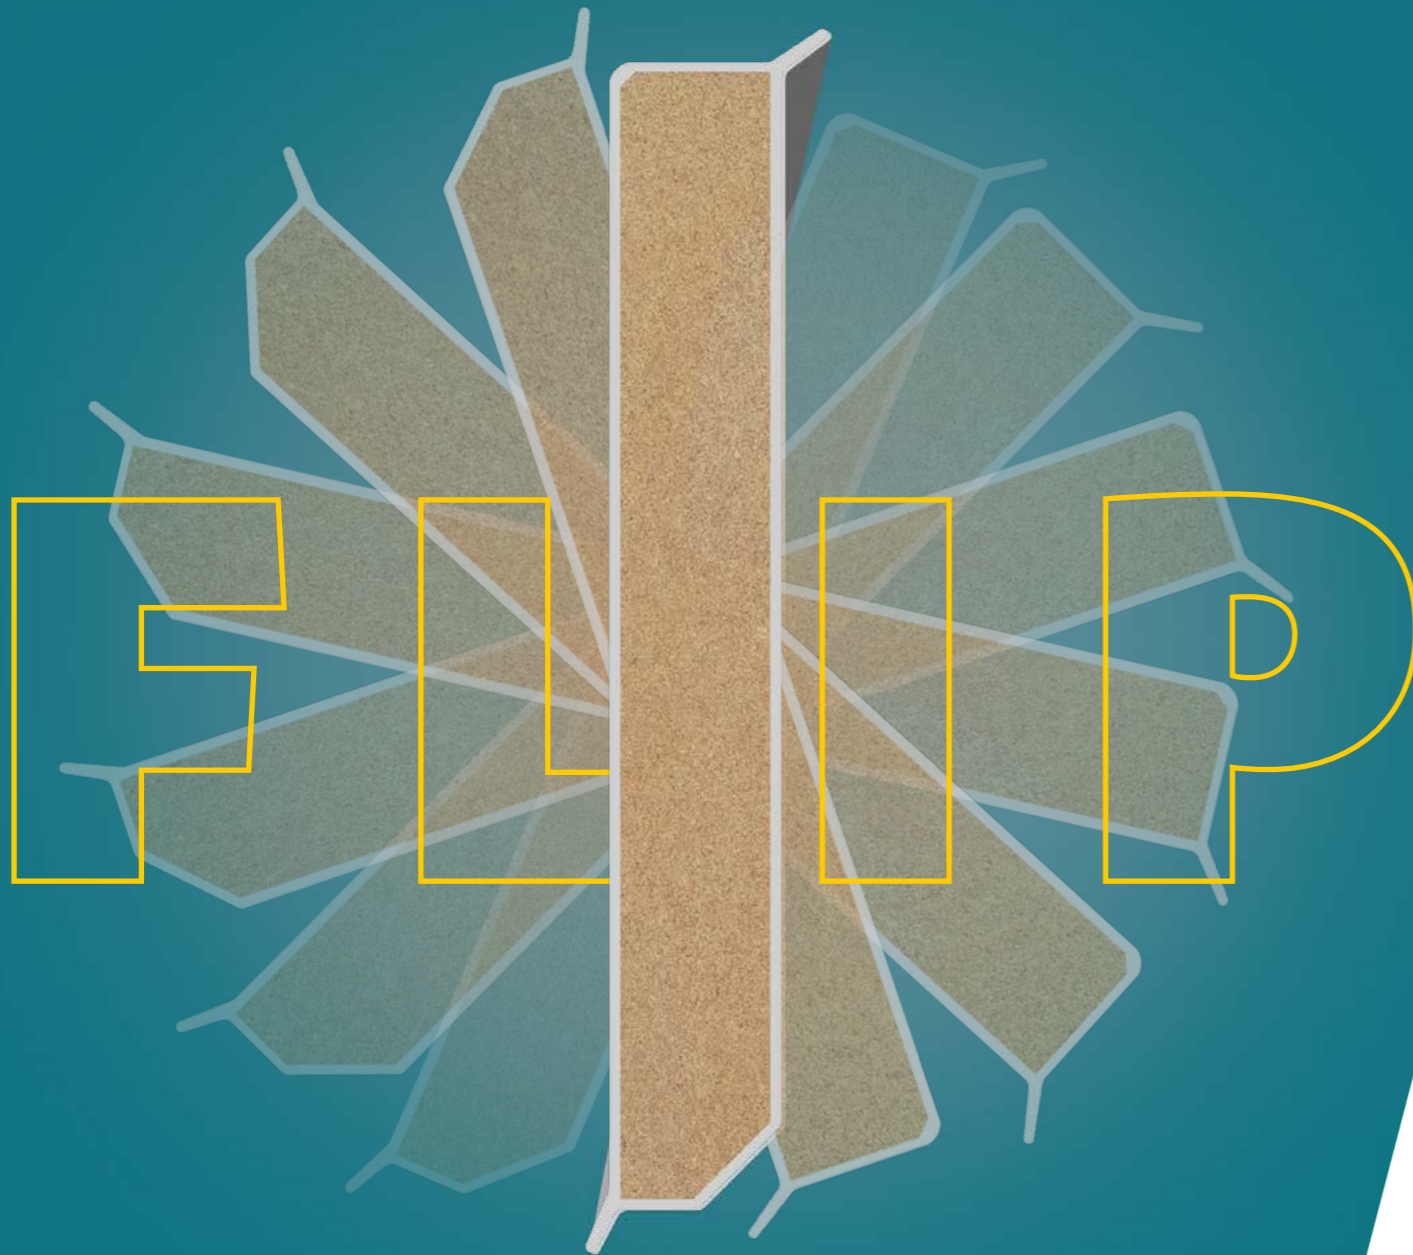

- ✓ MDF core with PP coating and sealing edges for wall and floor.
- ✓ Rear chamfer towards the floor facilitates installation.
- ✓ 2 mouldings in one: TURN or chamfered.
- ✓ External corners, internal corners, end pieces with closed surfaces possible through punching.
- ✓ Compatible with the most common punch and hot glue gun.
- ✓ Ideal with the professional set consisting of FN punch & FN hot glue gun.
- ✓ Waterproof with sealed cut edges.
- ✓ Numerous plain colours to choose from.
- ✓ Decors matched to the floor through digital printing.

The XTRA benefits for professionals

Many colours in stock, even more available to order

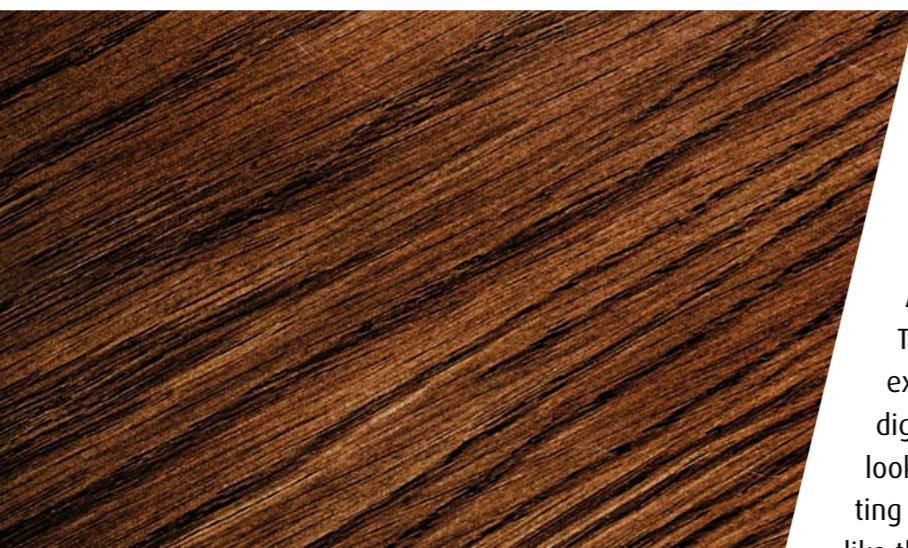

Choose from numerous plain colours, all of which we have in stock. **Do you need a very special design that perfectly matches your floor?** No problem with our in-house digital printing. Top quality at the touch of a button.

Around the corner

Mitre cuts for precise corner joints require the utmost precision and are therefore very time-consuming – not to mention the noise and dust. All that is a thing of the past with our extruded core skirting board. Simply punch, glue, done! This allows you to complete more projects and orders in less time and rely on first-class results.

**See, feel, marvel:
FN Digiprint**

At FN Neuhofer, we don't do things by halves. That's why we not only offer our new range of extruded core skirting boards, but also the latest digital printing technology. The result: a brilliant look and a unique feel. Look forward to printed skirting boards with a real wood character that also feel like the real thing – for a cosy living atmosphere.

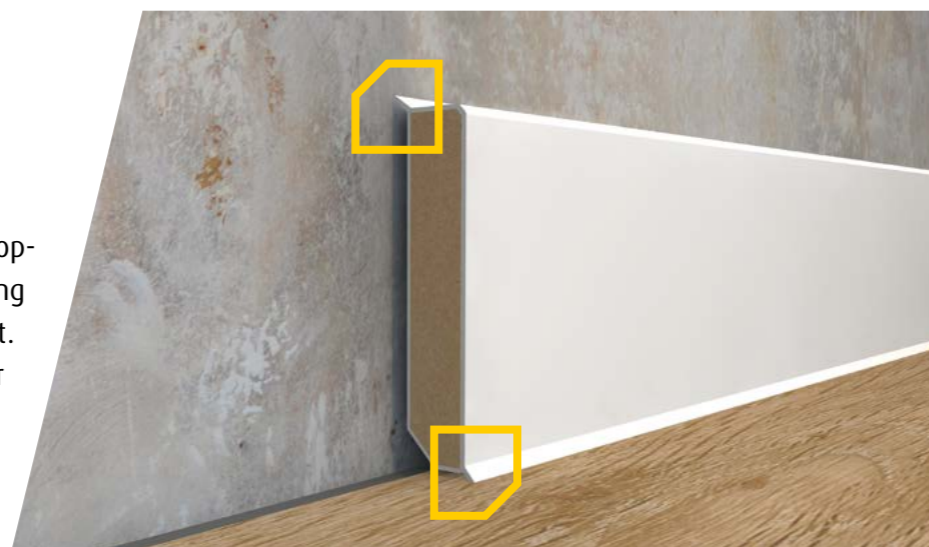

**Out with the old,
in with the new!**

Do you have one of the common punching tools at home that may be getting a bit old? Then we have a great offer for you: get the new FN Professional Set, consisting of a high-end punching tool and hot glue gun. This ensures optimal processes and results. Plus: if you exchange your 'old' one for our new one, you'll get a bonus on top!

**Everything sealed –
top and bottom**

Flexible sealing lips on both sides provide an optimal seal against the wall and floor, ensuring reliable protection against moisture and dust. This makes our core skirting board suitable for use in bathrooms and kitchens. You are on the safe side with the waterproof version, which is the best solution for damp rooms thanks to its sealed cut edges.

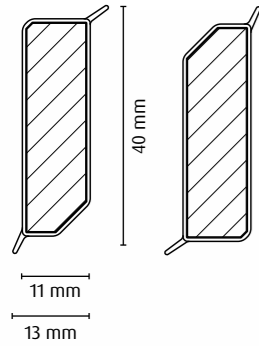

**And best of all:
Made in Austria**

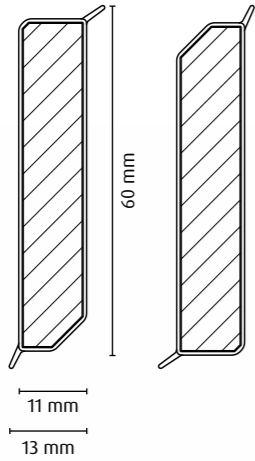

FN Neuhofer stands for innovative spirit, technological progress, smart solutions and top quality made in Austria – and has done so for 375 years! At our site in Zell am Moos, we consistently invest in state-of-the-art standards and passionately work on sustainable innovations.

More choice. More possibilities. Higher, longer, further – our range covers all requirements. Four skirting board shapes, various widths and heights, special lengths and the FN TURN-X reversible profile make every solution possible. The right core skirting board for every project. Think big!

With sealing lips. Without sealing lips. Depending on the application, we offer the reversible FN TURN-X and FN SWING-X profiles with or without sealing lips. The sealing lips compensate for irregularities in walls and floors and protect the floor expansion joint from dirt and moisture.

Without sealing lips, the profiles can also be used for other applications, e.g. in the kitchen area (drawers, plinth panels etc.).

Discover our wide range

FN FOILED PROFILES

Foiled mouldings are usually laid to laminate flooring. The reason is obvious: the same materials react in the same way to light and moisture. A wide range of shapes and decors leave almost nothing to be desired, especially when it comes to matching the decor of the skirting to the floor. In-house digital printing makes it possible!

FN SOLID WOOD PROFILES

Wood in its most natural form, cut and planed, raw or varnished, sustainable and destined to last forever: these are our solid wood profiles, made from hardwood or softwood. Real, natural and grounded. Whether you need a resilient skirting board, wood for crafts for everyone and everywhere in the house, or old wood for a one-of-a-kind ambience.

FN VENEERED PROFILES

A skirting board provides the perfect finish between the floor and the wall. The necessary expansion joint is stylishly and elegantly concealed and the profile, ideally in the same décor as the floor, completes the room. Veneered profiles are usually laid with parquet floors. The reason is obvious: the same materials react in the same way to light and moisture.

FN FLOOR ACCESSORIES

Clips, corners and numerous other accessories are indispensable for quick and easy moulding installation. The mouldings are all provided with functional grooves into which various clips, fixing rails or holders for corner pieces can be inserted. The aim is always the same: to make installation as easy and uncomplicated as possible for the customer.

FN WHITE PROFILES

White skirting boards are modern, elegant, stylish and very much in fashion. We offer an extensive variety of different materials and surfaces as well as shades of white. The following pages provide an overview of this product range. Find the perfect version for your market.

FN FLOORING PROFILES

When installing flooring, each room is usually laid as a separate area. During this process, an expansion joint should be planned under every door. And if the floor areas become too large, they should also be separated by expansion joints. If there are different coverings in the individual rooms, such as tiles, laminate flooring, parquet flooring or LVT flooring with different floor heights, it is essential to cover the joints that are created as a result.

FN FUNCTIONAL AND WATERPROOF PROFILES

If the standard no longer fits or special challenges need to be overcome, FN Neuhofer offers a selection of special solutions for a wide range of applications. And for LVT or waterproof floors, there are matching waterproof skirting boards, decorated to match the floor or simply in white.

FN LIVING

Modern wall design with additional benefits is important in today's fast-paced and noisy world. Acoustic panels create peace and quiet in your own home, while various wall panelling systems enhance the room and create a cosy ambience. And the DIY concept is not neglected either. You can fill, glue, paint and realise your own creativity.
