Feel the wall

NEUHOFFER

WE. KNOW. WOW!

Printed felt

Wallpaper has become boring, and classic tongue-and-groove wall panels are old-fashioned. Acoustic panels reduced to felt, without confusing slats, are the new trend. Attractively printed with numerous decorative options and cosy, soft, warm surfaces, they give wall design new dimensions and rooms a new lease of life.

Facts, facts, facts...

Size matters

Different applications require different sizes. We have the most important ones. And others on request.

Thickness 8 mm:

- >>> 560 x 1200 mm
- >>> 560 x 2400 mm
- >>> 560 x 2670 mm

Lots of designs to choose from

In-house digital printing offers many possibilities for wall design. A modern and trendy selection of decors covers many tastes in the areas of ornamental, vintage and floral, also with regard to colour schemes.

Digitally printed

Custom designs available on request

And if you can't find what you're looking for in the selection provided, we offer options for adding your own desired designs or images to the felt. Via the configurator, special order or personal connections. Where there's a will, there's a way.

The backing material

Polyester felt is ideal for reducing annoying noises. The incoming sound waves are caught in the fibrous structure and are only reflected from the wall to a reduced extent.

Made from PET fibres with up to **60% recycled content** (recycled PET bottles and/or old clothes)

It's getting quiet

Sound insulation: Reduces sound by up to 20% Weighted sound absorption coefficient: $\alpha_w = 0.20$ tested in accordance with EN ISO 354 and EN ISO 11654. Complies with sound class E.

Discover our wide range

FN FOILED PROFILES

Foiled mouldings are usually laid to laminate flooring. The reason is obvious: the same materials react in the same way to light and moisture. A wide range of shapes and decors leave almost nothing to be desired, especially when it comes to matching the decor of the skirting to the floor. In-house digital printing makes it possible!

FN VENEERED PROFILES

A skirting board provides the perfect finish between the floor and the wall. The necessary expansion joint is stylishly and elegantly concealed and the profile, ideally in the same décor as the floor, completes the room. Veneered profiles are usually laid with parquet floors. The reason is obvious: the same materials react in the same way to light and moisture.

FN WHITE PROFILES

White skirting boards are modern, elegant, stylish and very much in fashion. We offer an extensive variety of different materials and surfaces as well as shades of white. The following pages provide an overview of this product range. Find the perfect version for your market.

FN FUNCTIONAL AND WATERPROOF PROFILES

If the standard no longer fits or special challenges need to be overcome, FN Neuhofer offers a selection of special solutions for a wide range of applications. And for LVT or waterproof floors, there are matching waterproof skirting boards, decorated to match the floor or simply in white.

FN SOLID WOOD PROFILES

Wood in its most natural form, cut and planed, raw or varnished, sustainable and destined to last forever: these are our solid wood profiles, made from hardwood or softwood. Real, natural and grounded. Whether you need a resilient skirting board, wood for crafts for everyone and everywhere in the house, or old wood for a one-of-a-kind ambience.

FN FLOOR ACCESSORIES

Clips, corners and numerous other accessories are indispensable for quick and easy moulding installation. The mouldings are all provided with functional grooves into which various clips, fixing rails or holders for corner pieces can be inserted. The aim is always the same: to make installation as easy and uncomplicated as possible for the customer.

FN FLOORING PROFILES

When installing flooring, each room is usually laid as a separate area. During this process, an expansion joint should be planned under every door. And if the floor areas become too large, they should also be separated by expansion joints. If there are different coverings in the individual rooms, such as tiles, laminate flooring, parquet flooring or LVT flooring with different floor heights, it is essential to cover the joints that are created as a result.

FN LIVING

Modern wall design with additional benefits is important in today's fast-paced and noisy world. Acoustic panels create peace and quiet in your own home, while various wall panelling systems enhance the room and create a cosy ambience. And the DIY concept is not neglected either. You can fill, glue, paint and realise your own creativity.
